

Code Talk II Diagnostic Code Reader.

Code Talk 2 is a world renowned diagnostic handheld fault code reader for all global brake system manufacturers including **WABCO**, **HALDEX**, **KNORR-BREMSE** for their trailer ABS/EBS Braking systems.

Communicating via the CAN lines to access the ABS-EBS ECU memory, it reads out and clears any faults that are in the ECU. The Code Talk can also show live data like, air pressures, wheel speeds & voltages, which helps with quick diagnostics. It also acts as a Radio Remote Control to our VTC & TC. Once all connections to trailer are made, faults can be read out from inside your van.

- Easy to use Multi-Brand "Plug & Play" ABS-EBS fault reader.
- Saves money by having braking diagnostics in house.
- Allowing regular checks to the braking systems on the fleet
- Standalone device, no laptop logon or subscription fees.

If you would like to contact us to discuss in more detail on any of the above, you can do so by phone on 01785 714447 or you can email sales@air-brake.com
