

Van Trailer Check Scrutineer (VTC)

The Tractor unit in a box, offering one-man quick Mobile or Workshop Trailer Service

& Diagnostics. Tests lighting, ABS-EBS-CAN circuits and all Air Brake systems on trailers in one unit.

Powered from batteries or mains PSU, you simply plug all air & electrical lines into trailer. Then test lighting, ABS-EBS & Air Brake circuits in one go, you can safely operate the brakes by remote when close to or under the axles checking for bad slack adjusters & excessive wear etc. Even test the air pressures at the chamber using the Remote control.

- Reduces time taken to Service, Inspect or find faults on Trailers.
- Safer you're in control and no Smokey,
- Noisy Tractor Unit up front.
- Makes Brake testing a 1-man job.
- Enables you to fix multiple trailers which in turn earns more money.

If you would like to contact us to discuss in more detail on any of the above, you can do so by phone on 01785 714447 or you can email sales@air-brake.com
